Instructors
Lew Shelley, Snowhawk LLC & Emily Lord, UNH Cooperative Extension

What You’ll Learn
This workshop will cover all the basics of how to maintain high-quality trails. Perfect for Conservation Commissioners, local service clubs, land trust volunteers, private landowners, or anyone wanting to keep community trails in good condition. You’ll learn trail terminology, how to assess the condition of existing trails, and how to deal with water, slope, grades, and recreational uses. You’ll get hands-on experience with specialty tools and learn about options for borrowing tools for your volunteer efforts. We’ll cover safety and leading other volunteers, and how to determine if your trails project requires professional help. We’ll also have fun, using experiential learning to make sure everyone leaves with new skills.

What to Bring
Clothes appropriate for outdoor field work (long pants, long-sleeved shirt), rain gear (jacket and rain pants if you have them), sturdy boots, comfortable work gloves, water bottle. A bag lunch, to be enjoyed in the field, is included with your registration fee. Vegetarian options available. Optional/weather dependent: Bring cash for ice cream at Frekeys Dairy Freeze after the workshop!
